

HYODO et al  
Appl. No. 09/437,239  
July 26, 2004

### **REMARKS/ARGUMENTS**

Reexamination of the captioned application is respectfully requested.

#### **A. SUMMARY OF THIS AMENDMENT**

By the current amendment, Applicants basically:

1. Amend claims 9 and 12.
2. Respectfully traverse all prior art rejections.

#### **B. PATENTABILITY OF THE CLAIMS**

All claims are currently alleged unpatentable (1) over Honjo (USP 6,006,007) in view of Fujinami et al (USP 5,455,684) and (2) over Togo et al (JP 6 133268A) in view of allegedly admitted prior art. All prior art rejections are respectfully traversed in view, e.g., of the patentability arguments previously presented and the present amendments.

The present amendments to independent claims 9 and 12 are deemed to include further clarifying distinctions. Such amendments include reference to a sequence table memory and a key frame table memory. Support in the original specification is manifest for both the sequence table memory (see, e.g., element 12) and the key frame table memory (see, e.g., element 14), with reference, e.g., to the paragraph bridging pages 28 and 29 as well as other specification aspects such as Fig. 8A and Fig. 8B.

#### **C. MISCELLANEOUS**

In view of the foregoing and other considerations, all claims are deemed in condition for allowance. A formal indication of allowability is earnestly solicited.

The Commissioner is authorized to charge the undersigned's deposit account #14-1140 in whatever amount is necessary for entry of these papers and the continued pendency of the captioned application.

HYODO et al  
Appl. No. 09/437,239  
July 26, 2004

Should the Examiner feel that an interview with the undersigned would facilitate allowance of this application, the Examiner is encouraged to contact the undersigned.

Respectfully submitted,

NIXON & VANDERHYE P.C.
